Unpack and Prepare

What's in the box

Before installing your new TV, check you have everything needed.

In the box you will find:

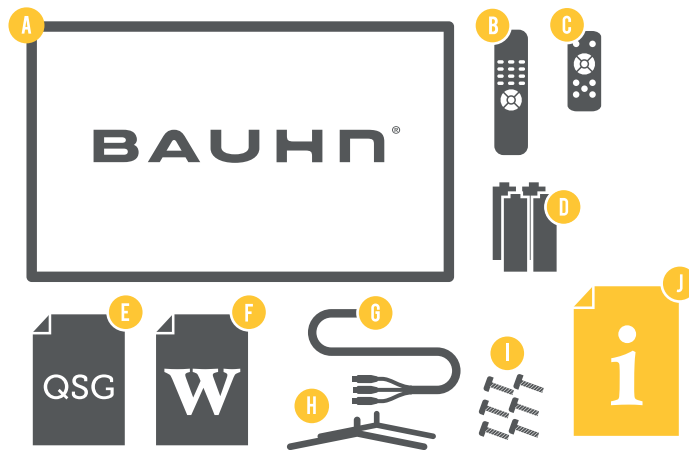

- A. Ultra HD TV
- B. Remote Control
- C. Easy Remote Control
- D. AAA Batteries
- E. Quick Start Guide
- F. Warranty Card
- G. AV Cable
- H. Stands
- I. Screws (for the stands)
- J. User Manual

You will need:

- Phillips-head screwdriver (for stand installation)
- Someone to help you lift and install your TV
- Antenna cable (to watch live TV)

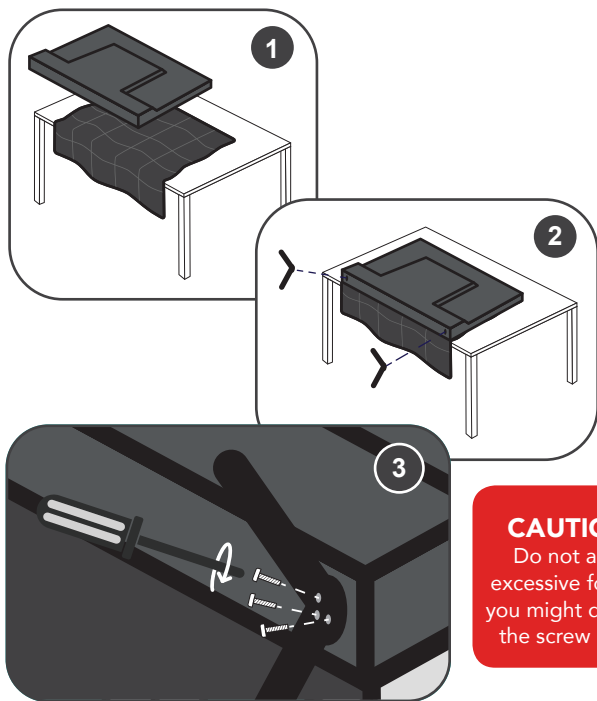

See the inside flap of the box for how to handle the TV without damaging it!

Important Tips

- Place the TV on a level surface.
- Place the TV away from any source that may generate heat or vibrations.
- Make sure there is enough space around vents for airflow.
- The remote control works up to 5 metres away from the TV.
- Unplug the TV before cleaning it.
- Clean using a dry cloth only - do not use water or chemicals.
- Use only the power supply provided.
- It is highly recommended to use safety straps for securing the TV in place.
- Keep liquid, children and pets away from the TV at all times.

Attaching the stand

CAUTION!
Do not apply
excessive force as
you might damage
the screw holes.

- This TV is heavy! We recommend asking someone to help you lift it.
- Unplug the TV from the power outlet before installing or removing the stand.
- Only touch the frame, not the screen.
- It is highly recommended to use safety straps for securing the TV.

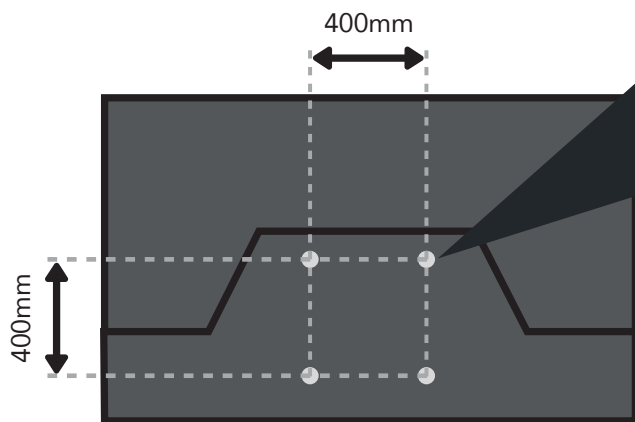

Unless you are wall-mounting the TV, you will need to attach its stand/legs.

1. Lay the TV face-down on a soft, flat surface (like the sofa, or a towel on a table).
2. See the 'L' and 'R' markings on the stand? Match them to the installation points on the underside of the TV.
3. Attach the stand to the TV at the installation points using the screws provided. (Grab a screwdriver for this bit). Make sure the legs are facing away from each other (not leaning inwards).

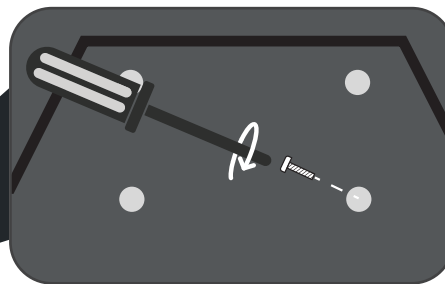

Wall-mounting the TV

- Unplug the TV from the power outlet before wall-mounting.
- Contact a professional for assistance with wall-mounting the TV.

Back of the TV

Required

- VESA Mounting Bracket
- 4 x M6*12mm screws (or longer as required)

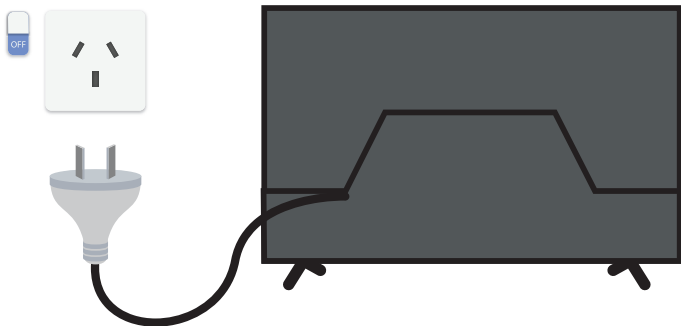

The TV comes with holes on the back panel for use with wall-mounting brackets (bracket not included).

Use four standard M6*12mm screws (or longer, depending on the mounting bracket) to wall-mount this TV (screws are not included).

The screws in the package are for securing the TV stand only. If you are wall-mounting the TV, consult a qualified installer for advice on bracket support and wall support.

Connect to power

Don't forget to plug in the TV to the power outlet. Leave the power switched off until installation is finished.

Connect your antenna

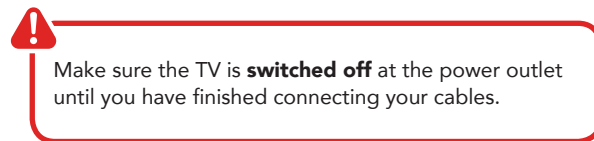

Free-to-air TV in HD (High Definition)

Example
HD Channels

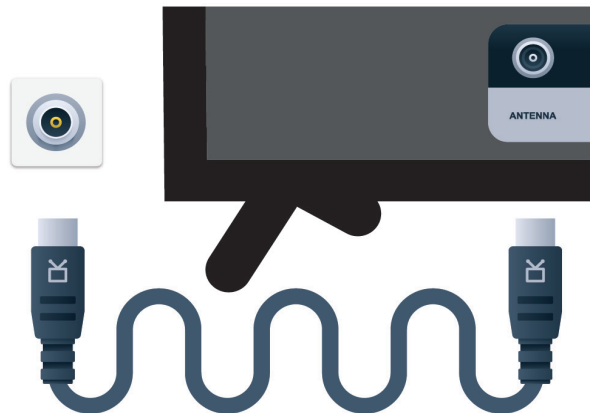

ABC HD
SBS ONE HD
7HD
9HD
10 HD
PRIME7 HD
WIN HD

High Definition (HD) channels provide the best viewing quality and are available with a digital antenna connection.

TV channels in Ultra HD resolution are not currently available in Australia. Therefore when you watch HD broadcast signals on an Ultra HD TV, the picture can appear 'soft' and lacks the detail you see when watching the same content on an HD TV.

Make sure the TV is **switched off** at the power outlet until you have finished connecting your cables.

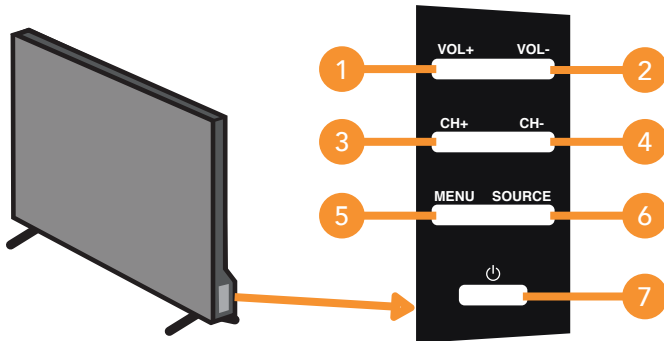

Antenna cable not included.

Controls and Connections

Get to know your TV

Buttons on the TV

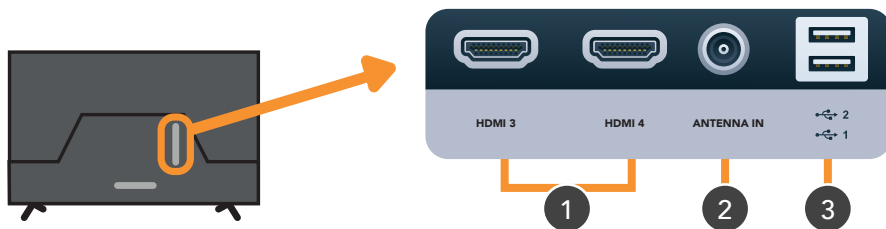

1. VOL + : Increase the volume level or move left.
2. VOL - : Decrease the volume level or move right.
3. CH + : Select the next channel or move up.
4. CH - : Select the previous channel or move down.
5. MENU : Enter the settings menu.
6. SOURCE : Change the input source.
7. ⏻ : Switch the TV ON or to Standby.

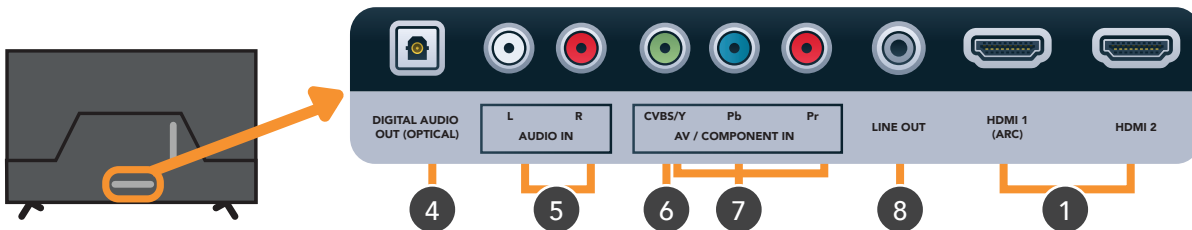

See next page for more info on the connections.

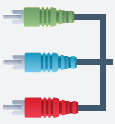

Ports on the TV

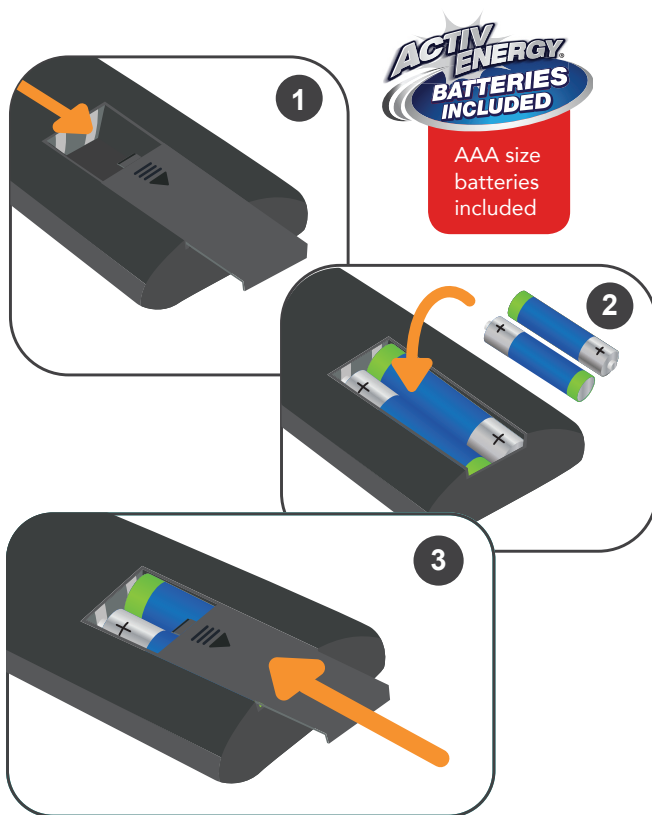

1	HDMI Use a high-speed HDMI cable for best picture and sound quality.		SOUND PICTURE COMPUTER	All-digital connection between the TV and any HDMI device. Supports Ultra HD. Requires a High Speed HDMI cable (not included).
2	Antenna		FREE-TO-AIR TV	Connect your antenna for live TV. (Antenna cable not included.)
3	USB		STORAGE	<ul style="list-style-type: none"> » PVR record and pause live TV » Play your stored media files (supported file codecs and extensions may vary). Supports up to Full High Definition (FHD) picture quality. » Software updates

4	Digital Audio Out (Optical)			SOUND	Connect an external digital audio device. Use an Optical cable (not included) to connect the unit with an amplifier, soundbar or other audio decoding device for digital audio signal output.
5	AUDIO IN			SOUND	You can use this to connect Audio to your TV for AV or Component video inputs. Requires an RCA Stereo Audio cable (not included).
6	AV IN			PICTURE	You can use this to connect your DVD player. Supports Standard Definition (SD) picture quality. Requires an AV cable (included).
7	Component IN			PICTURE	You can use this to connect your DVD player. Supports Full High Definition (FHD) picture quality. This also requires Requires a component cable (not included).
8	Line Out			SOUND	Connect to your headphones, amplifier or audio device, using an AUX cable (not included). (Audio output is at a fixed level, so use your external device to control the volume.)

Remote Control

Setup

Insert two AAA size batteries according to the polarity markings (+ / -) inside the compartment. Make sure the batteries are correctly aligned and properly pushed into place.

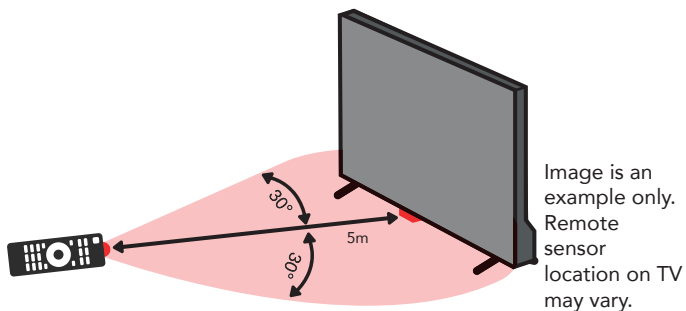

Precautions When Using Batteries

- Do not use old and new batteries together.
- Do not use different types of batteries (e.g. Manganese and Alkaline batteries) together.
- Remove the batteries from the remote if you do not intend to use it for a long time.
- When discarding used batteries, follow any guidelines for recycling and disposal of batteries that apply in your local area.
- Keep batteries away from children and pets.
- Never throw batteries into a fire or expose them to extreme heat.

Using the Remote Control

To use the remote, point it towards the remote sensor at the front of the TV. The remote will not operate if its path is blocked.

The remote has a range of up to about 5 metres from the TV at an angle of up to 30 degrees to either side of the sensor, as illustrated below.

Remote Hints and Tips

- Do not drop, step on or otherwise impact the remote control. This may damage the parts or lead to malfunction.
- Do not place objects between the remote control and the remote sensor.
- Do not use this remote control while simultaneously operating a remote control for other devices.

Standard Remote

POWER: Switch the TV to On or Standby.

GOTO: Jump to a different chapter of the DVD.*

ANGLE: View DVD playback from different angles, if the DVD has this feature.*

FAV: Press to display your favourite program in DTV mode.

TEXT: Switch between TV and Teletext mode.**

SUBTITLE: Enable/disable subtitles.

SIZE/ZOOM: Change the picture size.

MEDIA: Select USB mode.

|| : PLAY/PAUSE in TIMESHIFT and USB mode.

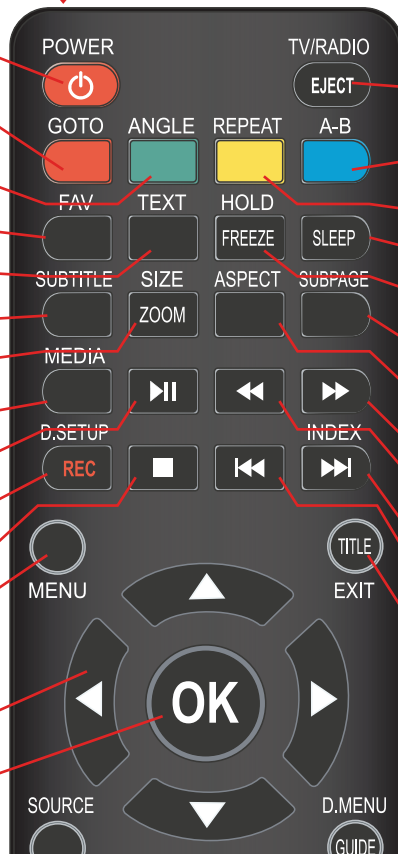

REC / D.SETUP: Record program in DTV mode / Display the main disc menu.*

■ : Stop playback.

MENU: Display the main TV menu.

▲ / ▼ / ◀ / ▶ : Press the UP/DOWN/LEFT/RIGHT buttons to navigate the on-screen menus and adjust the system settings.

OK: Display the channels list (DTV).

TV/RADIO / EJECT: Switch between TV or radio in DTV mode / Eject a disc (DVD).

A-B: Repeat selected DVD scenes.*

REPEAT: Repeat playback of a selected chapter, title, or the entire DVD.

SLEEP: Set the TV sleep timer.

FREEZE: Hold the picture temporarily.

SUBPAGE: Manually jump to the previous or next subpage of Teletext.**

ASPECT: Change the size of the image on your screen.

▶▶ : Move fast forward.

◀◀ : Move fast backward.

▶▶ / INDEX: Play next file./ Display the recorded programs list (DTV).

◀◀ : Play the previous file.

TITLE: Display the DVD title menu.*

SOURCE: Switch the input source.

MUTE: Mute the sound. Press again or press V+ to restore the sound.

VOL +/-: Turn the volume up/down.

DISPLAY: Display information of the current program.

NUMBER BUTTONS (0-9): Press to select a TV channel directly when watching TV.

-/-: Switch the digits.

AUDIO/LANG: Switch the available sound-track language (DTV/DVD).

GUIDE: Launch the TV Guide (DTV).

CH +/-: Change to the next or previous channel.

↶: Return to the previous channel.

S-MODE: Cycle through the different sound modes.

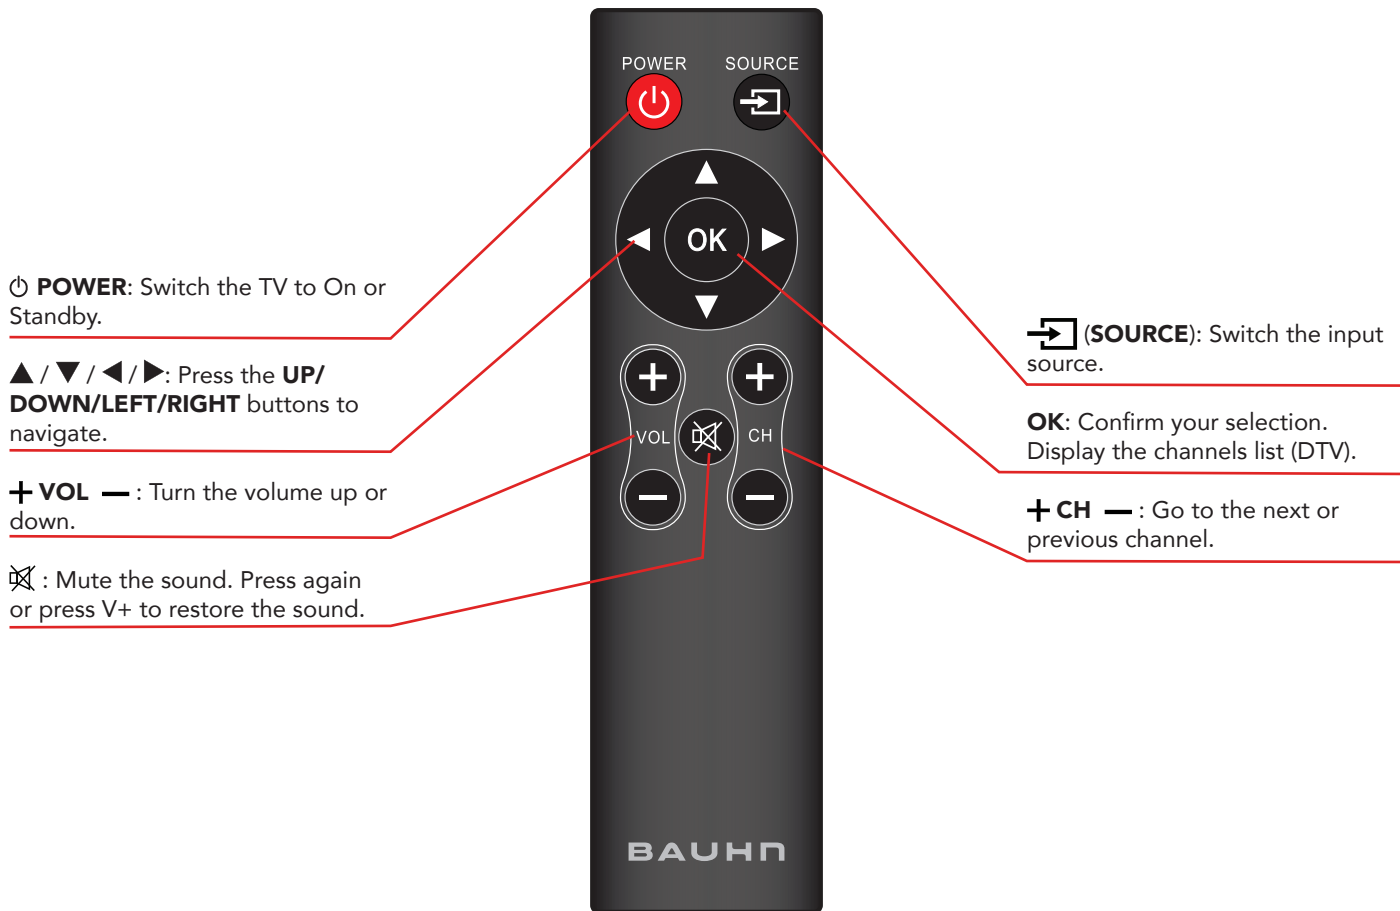

P-MODE: Cycle through the different picture modes.

* DVD-related function do not apply to this model TV.

** Teletext is no longer available in Australia.

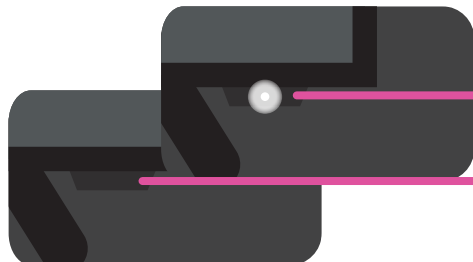

Easy Remote

On-Screen Set Up

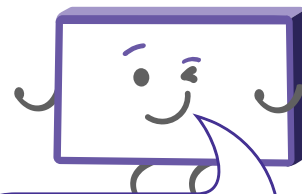

Make sure equipment is properly connected (as shown on pages 10-11) before connecting the TV to power.

On/Standby light is WHITE in standby mode.

On/Standby light is off when the TV is on.

Make sure the TV is plugged in at the power socket and switched on. Press the  (ON) button to turn on the TV.

First Time Setup menu

When you turn the TV on for the first time, the First Time Setup menu will appear.

Follow the prompts using the  /  /  /  buttons to select your preferences. You will be able to adjust:

System Language **Country** **Time Zone** **Tune Type**

Press **OK** to start auto tuning free-to-air channels.

If you make an error, you can update your preferences in the settings menu later.

TV Setting Menus

Menu Navigation Buttons

Press the **MENU** button to display the TV settings menu. See the guide below for all the other buttons you'll need to use to adjust and change your settings.

Function	Remote Button
----------	---------------

Display the main menu	
-----------------------	--

Select different sub-menus	
----------------------------	--

Enter a sub-menu	
------------------	--

Select preferred option	
-------------------------	--

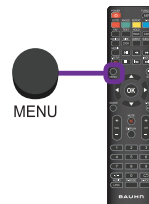

Adjust a value	
----------------	--

Return to the previous menu	
-----------------------------	--

Exit a menu	
-------------	--

Once you have programmed any settings, the unit will retain them in its memory until you change them, even after turning the TV off.

To access the TV guide, press the **GUIDE** button on the remote.

To activate the TV Channels use the ▲ / ▼ buttons to select a channel in the left column, then press OK to confirm.

Recording

Important Tips:

- Back-up your personal data before plugging in your USB to the TV. We do not assume liability for any loss of data due to misuse or malfunction.
- You cannot change channels while in recording mode.
- If the signal is interrupted while in recording mode, the recording will stop until the signal is established.
- Do not turn the TV off while it is in time-shift mode.
- The file recorded can only be used on this TV. Do not copy it to any other device.
- When connecting or disconnecting the USB storage device, ensure the TV is not in USB mode, otherwise the USB device or the files stored on it may be damaged.

Before you can record with this TV (including time-shift recording), you must insert your USB storage device into the USB port.

Recording Live TV

Instant Recording

Press **REC** once - start recording.

Stop Recording

Press **STOP** twice - display the dialogue box.

Select **YES** to stop recording.

Select **NO** to continue recording.

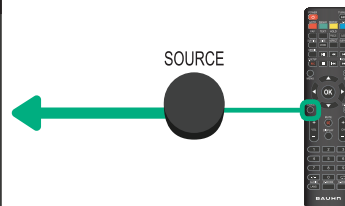

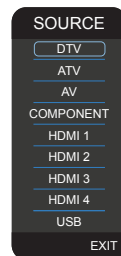

Scheduled recording

See TV Guide Functions on page 30 to schedule recordings and Schedule List functions on page 23 to manage schedules.

When a program is being recorded in the background (while the TV is in standby mode), the Standby/ON light will flash white.

Recording, scheduled recording and pause live TV functions only work in DTV mode (free-to-air).

Playback

Press the **INDEX** button to display the list of recorded programs.

Use the **▲ / ▼** buttons to select a recorded file.

Press the **OK** button to start playback in Full Screen Mode.

Press **RED** to delete the selected file.

Pause Live TV (Time-shift)

Temporarily pause the live TV signal, then resume playback at your convenience.

Before you can record with this TV (including time-shift recording), you must insert your USB storage device into the USB port.

Start Time-shift

Press the **⏸** button on the remote to enter time-shift mode.

Press the **⏸** button to resume playing the program.

Stop Time-shift

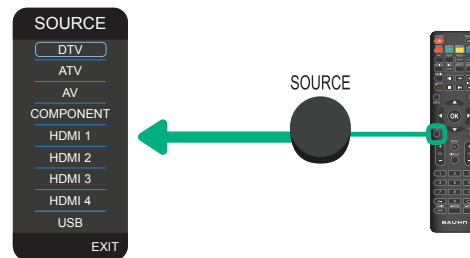

Press the **■ STOP** button to exit time-shift.

Press the **DISPLAY** button twice to bring up the on-screen display. Use the **◀/▶** buttons to select OSD buttons and press OK to control playback.

Recording, scheduled recording and pause live TV functions only work in DTV mode (free-to-air).

The USB storage device won't retain recorded data after you exit the time-shift function.

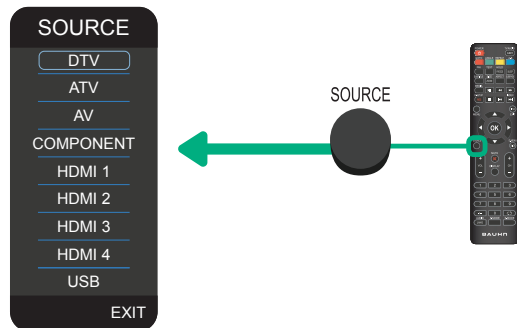

USB Mode

Set up

Insert your USB into a USB port on the TV.

Press the **SOURCE** button to select 'USB' mode or press the **MEDIA** button on the remote.

You can only play Photos in the Photo category, Music in the Music category and so on. Make sure you select the correct category for the file you wish to play.

Troubleshooting

If you experience problems with your TV, check below for advice. If you don't find a solution here, contact After Sales Support on 1300 886 649.

Problem	Solution
No power	<ul style="list-style-type: none">• Check the power outlet is turned on.• If using a multi-outlet, check if it is working properly. To check whether a power strip is working properly, plug the TV's power plug directly to a wall outlet and make sure the white indicator light on the TV is lit.• Try to power on using the button on the TV.
Button operation is not effective (unit and/or remote control)	Disconnect the power plug and then reconnect it. (The unit may not be operating properly due to lightning, static electricity or other factors.)
No operations can be performed with the remote control unit	<ul style="list-style-type: none">• Check the batteries are correctly installed.• The batteries may be exhausted: replace them.• Make sure to point the remote control at the remote control sensor and try it again.• Make sure to use the remote control at a distance of no more than 5 metres from the sensor.• Remove any obstacles between the remote control and remote control sensor.• When you press the power button on the remote, check that the power indicator light on the TV blinks.

Problem	Solution
Picture issues	<ul style="list-style-type: none"> • Ensure that all equipment is connected properly. If you are using an external device, turn it off, then turn it on again. If it says there is no signal on the screen, choose the correct source input. • Adjust the antenna position. • Move the TV away from electronic equipment or devices that could cause interference. • Auto-tune free-to-air TV channels again. • Try another channel. • When HDMI devices are connected, if the image keeps flickering, make sure the cable is: a high-speed HDMI cable; correctly connected to the port; and not faulty (bent or broken). • When trying to watch 4K UHD picture, if the image keeps flickering or there is no image, go to Menu > System > HDMI UHD and adjust the setting to 'Enhanced'.
Sound issues	<ul style="list-style-type: none"> • Ensure all equipment is connected properly. • Ensure the input setting for the TV is correct. • Ensure source input and audio settings on the external device are set correctly. • Ensure the volume is not muted. If it is, press the MUTE button to restore the sound. • If earphones are connected, unplug them. • Adjust the volume to a suitable level by pressing the VOL+ / VOL- button. • If you are using an external audio device, check that the Menu > Sound > S/PDIF setting is 'PCM'. • If you are using an external audio device via an HDMI cable, make sure the audio device supports HDMI-ARC. • If the TV sound is not synchronised with the picture, go to Menu > Sound > Audio Delay and adjust the sync.

Problems relating to your USB media storage device

Problem	Solution
My TV does not recognise my USB device or my external hard disk	<ul style="list-style-type: none">• First, refer to the instructions describing how to use USB devices with this TV.• If the problem still occurs, your USB device may not be compatible.• This TV has been tested with the majority of Flash memory-based devices and hard disks (media players with HDD) on the market; however, it may not be compatible with certain devices, in particular external self-powered hard disks.• Some USB storage devices may not be compatible with this TV.• Only use a USB storage device formatted in a FAT32 file system provided with the Windows operating system. If it is formatted by a different utility program that is not supported by Windows, it may not be recognised.
'Disk not ready' error	When you are in time-shift recording mode, without removing the USB recording device, you may experience some difficulty with a scheduled recording. You will need to remove the USB device as it is required to reset after each recording to protect the device from damage. If you see the message 'DISK NOT READY' displayed, remove the device, reconnect and proceed with your recording.
My media is loading slowly	For large file sizes and large capacity storage devices, the loading speed may be slower. The recognition speed of a USB storage device may vary depending on the device.
There is an 'unsupported file' message	If an "Unsupported File" message is displayed, it means the file extension, video codec, image resolution or frame rate is unsupported.

Compliance and Responsible Disposal

Packaging

The packaging of your product has been selected from environmentally friendly materials and can usually be recycled. Please ensure these are disposed of correctly. Plastic wrapping can be a suffocation hazard for babies and young children, please ensure all packaging materials are out of reach and are safely disposed of. Please recycle these materials rather than throwing them away.

Product

At the end of its working life, do not throw this product out with your household rubbish.

An environmentally friendly method of disposal will ensure that valuable raw materials can be recycled. Electrical and electronic items contain materials and substances which, if handled or disposed of incorrectly, could potentially be hazardous to the environment and human health.

National Television and Computer Recycling Scheme

The careful disposal of e-waste is important because many televisions and computers contain materials which are hazardous to people and the environment. There are no fees for householders or small businesses disposing of e-waste at a scheme collection service.

Individuals can contact their local council for information on local e-waste management services, find scheme services listed on Planet Ark's website at www.recyclingnearyou.com.au, or call Planet Ark on 1300 733 712.

Compliance

This product complies with the Australian Safety Standard AS/NZS 60065 to ensure the safety of the product.

Warranty Information

The product is guaranteed to be free from defects in workmanship and parts for a period of 12 months from the date of purchase. Defects that occur within this warranty period, under normal use and care, will be repaired, replaced or refunded at our discretion, solely at our option with no charge for parts and labour. The benefits conferred by this warranty are in addition to all rights and remedies in respect of the product that the consumer has under the Competition and Consumer Act 2010 and similar state and territory laws.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and to compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Repair and Refurbished Goods or Parts Notice

Unfortunately, sometimes faulty products are manufactured, which need to be returned to the supplier for repair.

Please be aware that if your product is capable of retaining user-generated data (such as files stored on a computer hard drive, telephone numbers stored on a mobile telephone, songs stored on a portable media player, games saved on a games console or files stored on a USB memory stick) during the process of repair, some or all of your stored data may be lost. We recommend you save this data elsewhere prior to sending the product for repair.

You should also be aware that rather than repairing goods, we may replace them with refurbished goods of the same type or use refurbished parts in the repair process.

Please be assured though, refurbished parts or replacements are only used where they meet ALDI's stringent quality specifications.

If at any time you feel your repair is being handled unsatisfactorily, you may escalate your complaint. Please telephone us on 1300 886 649 or write to us at:

Tempo (Aust) Pty Ltd ABN 70 106 100 252
PO Box 6056, Frenchs Forest, NSW 2086, Australia
